

How to search our catalog on-line

This is a PDF and can be searched with the “CTRL+ F” keys.

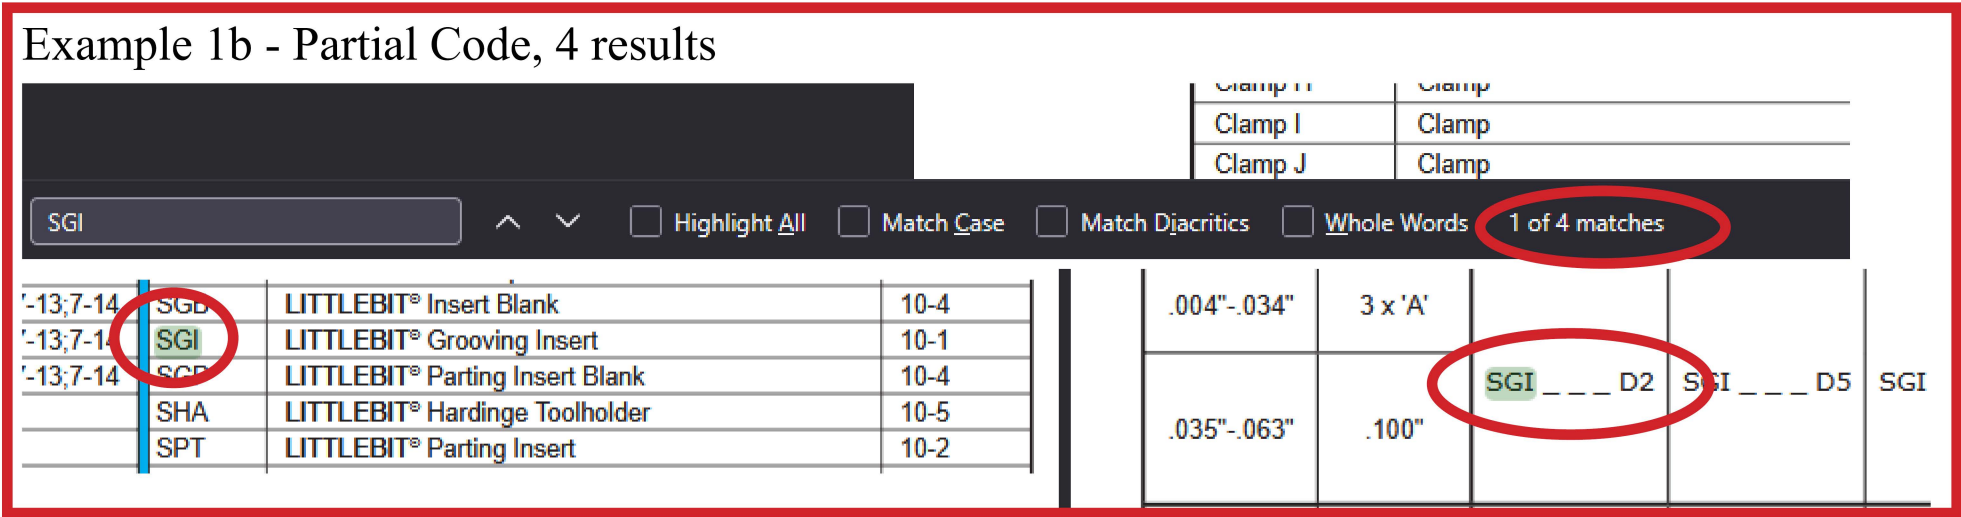

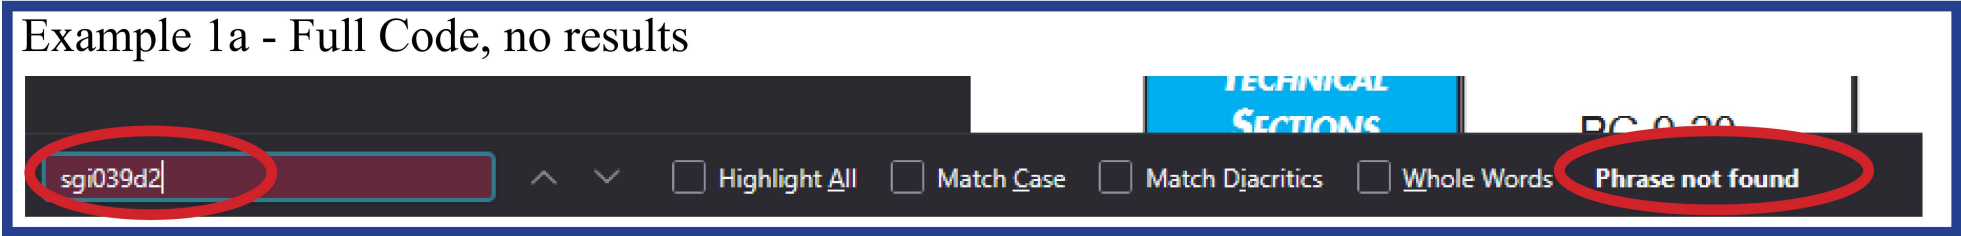

This menu appears at the bottom.
*** Some browsers may look different. ***

You can search for a partial (example 1) or full number (example 2).

Example 1

Some part numbers are in the catalog with _ _ _ for variables so only the partial search will have results.

Example 2

If a partial number brings you back a lot of options, see [example 2a](#), you can add more characters to filter down your results. See [example 2b](#) of a part number that is whole in the catalog.
